

OSMA Infrastructure:
Rock Swales & Concrete “V” Ditches

- The following maps identify the length and type of drainage ditches in Fountaingrove II Open Space and any associated Drains
- The ditches identified as “CVD” are concrete “V” ditches. There is a total of 3,135 linear feet of CVD. The width varies from 2 feet to 4 feet.
- The ditches identified as RS are Rock Swales. There is a total of 6,055 linear feet of RS. On average they are about 30” wide, but vary from 18” to 6’
- In addition to the CVD’s and RS’s, the maps identify a 225’ sidewalk, a 55’ retaining wall and a small dam and settling pond that were not included in the last reserve study.
